The department of Agricultural Sciences, Biology, Environmental Sciences, Department of Chemistry, Environmental Design And Health And Nutritional Sciences are eagerly working with all their resources for LIFE BELOW WATER by various courses, publications, activities and student internships. Overall, 37 faculty members are currently engaged in the working of this SDG and adding their due share in the betterment of life of people

- University has built various water absorption areas and rain water collection repository. Total water absorption area: 145442 m²
- AIOU has constructed three water recharge wells at the campus with the technical assistance of the PCRWR team in 2021. These wells are fully operational and play their role in recharging depleted zones of underground water. Maximum rainwater is being harvested from catchment areas and sent back to underground from aquifer recharge.
- Rain water collection points are installed at main campus and some of the regional campuses where collected rain water from the roofs of the buildings is discharged into the local ponds and canals around the buildings. The rainwater collected is used mainly for toilet flushing and for watering the plants inside the building and washing buses.
- AIOU plays an active role in creating mass awareness on water conservation.
